

Heavy Duty Outdoor Fitness Stations from SportsPlay!

The HD Outdoor Fitness line features:

- Improved torsion system—ensures resistance against the user when performing exercises—with gradual increased resistance and balanced movement with no sudden stops and fast movements, which can cause injuries.
- Hot dip galvanized metal parts with special metallic paint that makes the product look like stainless steel.
- Fully assembled—stations ship nearly fully assembled, reducing installation costs at the site.

Our new and improved line of modern outdoor fitness stations is now available. There are 10 specialized stations featuring a wide range of popular exercise events that challenge all major muscle groups while building cardiovascular endurance. Several stations allow partners to work out simultaneously—and having a workout partner increases motivation.

• Plastic parts are 3-4 mm thick polyethylene and are available in 9 assorted colors.

• Tough rubber coated steel seats and pedals to ensure a long lifetime.

A SPORTSPRAY EXCLUSIVE!

MODERN FITNESS

Ten specialized fitness stations feature a wide range of popular exercise events that will challenge all major muscle groups while building cardiovascular endurance.
